Sperm are produced by meiosis (see Chapter 13: The Cell Cycle). Sperm are highly specialised cells containing three parts: head, midpiece and tail. Head: contains the nucleus with 23 chromosomes (human haploid number) and an acrosome – needed to penetrate the egg cell at fertilisation.

### **Chapter 41: Human Reproductive System | Leaving Cert Biology**

The testes are a pair of male reproductive organs that produce sperm and some reproductive hormones. Each testis is approximately 2.5 by 3.8 cm (1.5 by 1 in) in size and divided into wedge-shaped lobules by connective tissue called septa. Coiled in each wedge are seminiferous tubules that produce sperm.
