

Chapter 18 Lab Dichotomous Keys

In this lab, you will first use a dichotomous key to identify sharks. A dichotomous key is built around pairs of statements that describe a visible trait. The reader must select the statement in each pair that best describes an organism. By following the steps in the key, the reader narrows down the list of choices and finally names the organism.

Chapter 18 Lab Dichotomous Keys

Chapter 18 Lab Dichotomous Keys. STUDY. PLAY. Name three different physical traits that are used in the shark dichotomous key. Flattened body, mouth at the front of the head, long, sawlike projection from snout. Do all the sharks you will try to identify belong to the same genus? Explain your answer.

Chapter 18 Lab Dichotomous Keys Questions and Study Guide ...

Chapter 18 Lab Dichotomous Keys Introduction In May 2007, scientists and other volunteers gathered in Rock Creek Park, Washington, D.C., to participate in a BioBlitz—a quick, 24-hour survey of species living in the park. Teams worked in 4-hour shifts throughout the park. By the time they were done, the teams had

Unformatted text preview: Chapter 18 Classification Real-World Lab Classifying Organisms Using Dichotomous Keys One tool used to identify unfamiliar organisms is a dichotomous key. A dichotomous key is a series of paired statements that describe physical characteristics of different organisms.

Making a Dichotomous Key - Chapter 18 Classification Real ...

organisms is a dichotomous key. A dichotomous key is a series of paired statements that describe physical characteristics of different organisms. In this activity, you will use a dichotomous key to identify tree leaves. Problem How are dichotomous keys used and made? Materials • 6–8 writing implements or other group of common items

Chapter 18 Classification Real-World Lab

Then, you will create your own dichotomous key to categorize a class set of your shoes. Problem How is a dichotomous key used to distinguish among similar organisms? Pre-Lab Discussion Read the entire investigation. Then, work with a partner to answer the following questions. 1. How many choices does a dichotomous key provide at each step? 2.

18 Using and Constructing a Classification Key, SE

Chapter 18 Classification Identifying Vertebrates Using Classification Keys Introduction Organisms such as vertebrates (animals with backbones) are classified into groups according to certain characteristics. Using these characteristics, classification keys can be developed. Biologists develop these classification keys so they can be used to ...

18 Identifying Vertebrates Using Classification Keys, ATE

Chapter 18 Lab Dichotomous Keys Introduction In May 2007, scientists and other volunteers gathered in Rock Creek Park, Washington, D.C., to participate in a BioBlitz—a quick, 24-hour survey of species living in the park. Shark Dichotomous Key Lab - isd2135.k12.mn.us

dichotomous key is a listing of specific traits, primarily structural, that allows an organism to be

sorted into one of two categories. Some biological keys give more than two choices for each branching point. By using a dichotomous key unknown organisms can be identified. Procedure: Part A: Using the key . 1. Read traits 1A and 1B of the Life ...

CLASSIFICATION LAB U DICHOTOMOUS KEY - rhnet.org

in the Dichotomous Key for the Extinct Animals shown in Figure 1. If an animal is ectothermic, what is the next step in the key? Explain. If an animal is ectothermic, you skip statements 2–5 and go directly to statement 6 as directed. Statements 2–5 describe characteristics of endotherms. Biology Laboratory Manual B/Chapter 18 131
